

OFFICIAL RELEASE • VERSION 2.0

CarelioEMR User Manual & Operations Guide

Complete Illustrated Guide for Site Administration, Caribbean Regional Demographics, and Automated Subscription Lifecycle Management.

Product: CarelioEMR Multi-Tenant Platform **Modules:** `site_admin_config` & `carelio_subscription`

Date: October 2026 **Data Policy:** Zero Data Loss Guaranteed

1. System Roles & Access Hierarchy

CarelioEMR strictly enforces the principle of least privilege. Permissions are partitioned into three clearly defined user tiers:

USER ROLE	PRIMARY RESPONSIBILITIES	SUBSCRIPTION & ADMIN RIGHTS
Super Administrator <code>admin</code>	Global platform infrastructure, OpenEMR module registry, system database migrations.	Full system-wide administrative control across all tenant instances.
Site Administrator <code>siteadmin</code>	Clinic tenant owner, clinician account provisioning, Caribbean demographic settings, Subscription renewals and reactivation.	Sole permission to renew, extend, and reactivate clinic subscriptions via <i>Administration</i> → <i>Carelio Subscription</i> .
Clinicians & Staff <code>dr_johnson</code> , <code>receptionist</code>	Patient registrations, vitals, medical chart notes, encounter billing, appointment schedules.	Read-only subscription status. Access is suspended automatically if the tenant is deactivated.

Security Rule: Regular clinicians and front-desk staff cannot alter, renew, or view sensitive subscription

billing details. Only designated Site Administrators have access to subscription management controls.

2. Module 1: Site Admin Configuration & Onboarding

2.1 Branded Clinic Login Experience

Every tenant instance of CarelioEMR features customized high-resolution clinic branding, from the browser favicon to the primary sign-in splash screen.

Figure 1: CarelioEMR Custom Tenant Login Interface with Secure Single Sign-On.

- 1 Open your browser and navigate to your clinic URL: <https://your-domain/oemr/interface/login/login.php?site=site-dr-sarah-johnson-1>.
- 2 Enter your assigned **Username** and **Password**.
- 3 Click **Login**.

2.2 Mandatory First-Time Temporary Password Reset

To ensure healthcare data privacy and compliance with HIPAA and Caribbean health data standards, newly provisioned administrator accounts must replace their initial temporary password upon first sign-in.

CarelioEMR Security Portal — Temporary Password Update

 **CarelioEMR**

Set Your Permanent Password

For account security, you must update your initial administrator credentials.

Current Temporary Password

🔒 CSRF Protected — Automatically redirects to tenant login page upon update

Figure 2: Mandatory First-Time Password Reset Dialog with Live Complexity Verification.

- 1 Enter your current **Temporary Password**.
- 2 Enter a **New Permanent Password** meeting complexity requirements (8+ characters, uppercase letter, number, or symbol).
- 3 Confirm your new password and click **Save Password & Proceed to Login**.
- 4 Your credentials are saved, and you are immediately redirected back to the login page for an authenticated session.

2.3 Caribbean Geographic Demographics Engine (Saint Lucia)

CarelioEMR includes integrated geographic demographic datasets covering **29 Caribbean nations**, all **10 administrative districts of Saint Lucia**, and **367 verified localized communities**.

The screenshot shows the 'CarelioEMR — Patient Registration & Demographics' interface. At the top right, a tab indicates 'Saint Lucia Regional'. A green banner at the top left states 'Caribbean Geographic Demographics Engine (Active)' with a checkmark icon, and to its right, it lists '29 Caribbean Nations • 10 Saint Lucia Districts • 367 Communities'. Below this, the form includes fields for 'FIRST NAME' (Marcus), 'LAST NAME' (Alexander), and 'DATE OF BIRTH' (1988-04-14). A dashed blue box highlights the 'DYNAMIC CASCADING SELECTION' section, which contains three dropdown menus: '1. Country (Selects Nation)' with 'Saint Lucia (LC)' selected, '2. Administrative District' with 'Castries' selected (noted as 'Populates 10 LC Districts'), and '3. Local Community' with 'Babonneau' selected (noted as 'Filtered to Castries (367 Total)'). Below these are 'STREET ADDRESS' (Hill Top Road, Building 4A) and 'POSTAL CODE' (LC01 101) fields. At the bottom left are 'Save Patient' and 'Cancel' buttons. At the bottom right, a note states 'Database stored in OpenEMR list_options schema'.

Figure 3: Client-Side Dynamic Cascading Dropdowns for Saint Lucia Districts and Communities.

When registering a patient under *Patient / Client* → *New / Search*:

- **Step 1 (Country):** Select **Saint Lucia (LC)**.
- **Step 2 (District):** The district dropdown instantly populates Saint Lucia's 10 administrative districts (Castries, Gros Islet, Soufrière, Vieux Fort, Micoud, Dennery, Anse la Raye, Canaries, Laborie, Choiseul).
- **Step 3 (Community):** Selecting a district instantly filters the community dropdown to its localized communities (e.g., selecting *Castries* displays *Babonneau*, *Bisee*, *Marchand*, *Ciceron*, etc.).

3. Module 2: Subscription Management & Lifecycle

3.1 Subscription Lifecycle Architecture

The CarelioEMR subscription engine governs account standing through an automated, server-enforced 4-stage lifecycle state machine:

3.2 Stage 1: Active Subscription

When the subscription is current and has more than 2 days remaining, the dashboard displays a vibrant green **ACTIVE** badge. All clinic staff have full access.

Figure 5: Subscription Management Dashboard in ACTIVE State.

3.3 Stage 2: Expiring Soon Reminder (≤ 2 Days / 48 Hours)

When the subscription is within 48 hours of expiration, the module transitions to **EXPIRING SOON**.

CarelioEMR Subscription Management

● STATUS: EXPIRING SOON

**Subscription Renewal Reminder — Expires in ≤ 2 Days**

Your clinic subscription will end on 2026-10-08 (2 days remaining). An automated email reminder has been sent to your billing contact. Please renew today to prevent entry into grace period.

DAYS REMAINING

2 Days (48 Hours)

EXPIRATION DATE

October 08, 2026

CLINIC ACCESS

Full Unlocked Access**Site Administrator Renewal Options**

Renew for 1 Month

Renew for 1 Year

Custom Extension

Figure 6: Warning Banner and Expiration Reminder within the 2-Day Threshold.

Automated Action: The background monitoring process automatically sends an email reminder to clinic administrators prompting them to renew. Clinical workflows remain 100% active and uninterrupted.

3.4 Stage 3: Expired / Grace Period (2-Day Window)

If the primary expiration date passes without payment, CarelioEMR immediately grants a **2-Day Grace Period** (**EXPIRED / GRACE PERIOD**).

Figure 7: Active 2-Day Grace Period Dashboard with Operational Continuity Assurance.

Zero Care Disruption: Doctors, nurses, and laboratory staff continue treating patients without any system interruptions throughout the entire 48-hour grace window.

3.5 Stage 4: Safe Deactivation & 100% Data Preservation

If the 2-day grace period elapses without renewal, the tenant enters **DEACTIVATED**.

CarelioEMR Subscription Management

● STATUS: DEACTIVATED

Tenant Deactivated — Safe Suspension Enforced

The 2-day grace period has passed without renewal. Staff and clinician logins are locked server-side.

🔒 **100% Data Preservation Guarantee: Zero patient records, notes, encounters, or billing rows have been deleted.**

ACCOUNT ACCESS

Locked (Staff)

CLINICAL DATA STATUS

100% Intact & Safe

REACTIVATION TIME

Instant (1 Click)

Site Administrator Instant Reactivation

Only Site Administrators have permission to reactivate. One click will restore ACTIVE status and immediately unlock clinician logins.

⚡ **Reactivate Tenant (+30 Days)**

Annual Reactivation (+1 Yr)

Figure 8: Safe Deactivation Panel with 1-Click Site Admin Reactivation.

🔒 100% Data Preservation Guarantee:

- **ZERO Patient Records are deleted.**
- **ZERO Clinical Notes or Encounters are deleted.**
- **ZERO Billing Invoices or Financial data are touched.**
- **ZERO Database Users are removed.**

The entire clinic database remains completely intact and is instantly unlocked the moment the Site Administrator reactivates the subscription.

3.6 Regular Clinician Lockout Screen

While a tenant is deactivated, non-admin clinicians are greeted with a secure, polite lockout notice preventing chart modifications until the subscription is renewed:

Clinic Account Subscription Inactive

Access to this CarelioEMR tenant is temporarily suspended pending subscription renewal.

100% Data Preservation Guarantee

All patient charts, clinical notes, appointments, and billing records are completely safe and untouched. Your site will be instantly restored with all data available upon renewal.

How to restore access:

Please notify your clinic's Site Administrator or contact billing@carelioemr.com

4. Site Administrator Operations (How-To Guide)

To manage subscriptions, navigate to: [Administration](#) → [Carelio Subscription](#) in the top navigation bar.

4.1 Renewing a Subscription

- 1 Under **Site Administrator Controls**, locate the **Quick Renewal** panel.
- 2 Click **+ 1 Month** to add 30 days, or **+ 1 Year** to add 365 days.
- 3 The system updates the expiration date, sets the status to **ACTIVE**, and logs an entry in the audit trail.

4.2 Custom Expiration Date Override

- 1 In the **Custom Expiration Date Override** field, select your desired date (e.g., [2026-12-31](#)).

- 2 Click **Extend Date**.
- 3 The record is updated immediately.

4.3 Reactivating a Deactivated Site

- 1 Log into the subscription management panel as Site Administrator.
- 2 Click the prominent green button: ⚡ **Reactivate Tenant (+30 Days)**.
- 3 Status is instantly restored to **ACTIVE**, and all clinician accounts are immediately unlocked.

5. How to Test the Subscription Module (Interactive Simulator)

To demonstrate and test the system without waiting days for dates to roll over, an **Interactive Test Simulator** is embedded directly into the subscription dashboard:

SIMULATION BUTTON	SIMULATED CONDITIONS	EXPECTED SYSTEM BEHAVIOR
Simulate ACTIVE	Expiration set to +30 days from today.	Status changes to ACTIVE . Full clinic access.
Simulate EXPIRING (2d)	Expiration set to exactly +2 days from today.	Status changes to EXPIRING_SOON . Amber reminder banner displays.
Simulate GRACE PERIOD	Expiration set to yesterday (-1 day).	Status changes to EXPIRED_GRACE_PERIOD . Orange 48-hour grace banner displays. Clinical operations remain uninterrupted.
Simulate DEACTIVATE	Expiration set to -3 days (grace elapsed).	Status changes to DEACTIVATED . Red lockout banner displays. Clinicians locked server-side; data remains 100% safe.

6. Production Daily Automated Background Process

CarelioEMR includes a daily automated background process that evaluates subscriptions across all clinic tenants:

```
php artisan carelio:check-subscriptions
```

Tasks Executed by the Background Daemon:

- Scans tenant databases for upcoming expiration dates.
- Dispatches email reminders when subscriptions have ≤ 2 days remaining.
- Transitions expired subscriptions into the 2-day grace period.
- Safely deactivates accounts where the grace period has elapsed.
- Maintains 100% database integrity with zero record deletion.

Production Scheduler Configuration (Cron):

```
0 1 * * * cd /var/www/carelio && php artisan carelio:check-subscriptions >> /var/log/carelio_s
```
